Cheirolophus teydis

Fruit, seed and dispersal

Dispersal mode: **Anemochory**
Dispersal distance class: **3**

Trophic mode

Parasitism and mycoheterotrophy: **autotroph**
Carnivory: **non-carnivorous**
Symbiotic nitrogen fixation: **no nitrogen-fixing symbionts**

Habitat and sociology

EUNIS habitat

Diagnostic species of EUNIS habitats: **S76 Canarian mountain hedgehog-heath**, **T3E Macaronesian Juniperus forest**
Constant species of EUNIS habitats: **T3E Macaronesian Juniperus forest**

Broad habitat

Occurrence in broad habitats: **Oromediterranean scrub, Forest**
