

# ***Eichhornia***

## **Habitus and growth type**

Plant height [m]: **0.3**

Life span: **Perennial**

Life form: **Hydrophyte**

## **Leaf**

Specific leaf area [mm<sup>2</sup>/mg]: **49.53**

## **Flower**

Flowering period: **May-September**

## **Trophic mode**

Parasitism and mycoheterotrophy: **autotroph**

Carnivory: **non-carnivorous**

Symbiotic nitrogen fixation: **no nitrogen-fixing symbionts**

## **Taxon origin**

Origin in Europe: **neophyte**

## **Habitat and sociology**

Broad habitat

Occurrence in broad habitats: **Aquatic, Wetland**
