

# ***Acer obtusatum***

## **Habitus and growth type**

Plant height [m]: **8.62**

Life span: **Perennial**

Life form: **Phanerophyte, Tree**

## **Leaf**

Specific leaf area [mm<sup>2</sup>/mg]: **19.63**

## **Flower**

Flowering period: **March-April**

## **Fruit, seed and dispersal**

Dispersal mode: **Anemochory**

Dispersal distance class: **4**

## **Trophic mode**

Parasitism and mycoheterotrophy: **autotroph**

Carnivory: **non-carnivorous**

Symbiotic nitrogen fixation: **no nitrogen-fixing symbionts**

## **Habitat and sociology**

Broad habitat

Occurrence in broad habitats: **Forest**
