Andryala pinnatifida

Fruit, seed and dispersal

Dispersal mode: **Anemochory**
Dispersal distance class: **3**

Trophic mode

Parasitism and mycoheterotrophy: **autotroph**
Carnivory: **non-carnivorous**
Symbiotic nitrogen fixation: **no nitrogen-fixing symbionts**

Taxon origin

Origin in Europe: **native**

Habitat and sociology

EUNIS habitat

Diagnostic species of EUNIS habitats: **R53 Macaronesian thermophilous forest fringe**, **S76 Canarian mountain hedgehog-heath**, **T28 Macaronesian heathy forest**
Constant species of EUNIS habitats: **R53 Macaronesian thermophilous forest fringe**, **S76 Canarian mountain hedgehog-heath**, **T28 Macaronesian heathy forest**

Broad habitat

Occurrence in broad habitats: **Grassland (non-alpine, non-saline), Oromediterranean scrub, Forest**
