

# *Andryala pinnatifida*

## Fruit, seed and dispersal

Dispersal mode: **Anemochory**

Dispersal distance class: **3**

## Trophic mode

Parasitism and mycoheterotrophy: **autotroph**

Carnivory: **non-carnivorous**

Symbiotic nitrogen fixation: **no nitrogen-fixing symbionts**

## Taxon origin

Origin in Europe: **native**

## Habitat and sociology

### EUNIS habitat

Diagnostic species of EUNIS habitats: [R53 Macaronesian thermophilous forest fringe](#), [S76 Canarian mountain hedgehog-heath](#), [T28 Macaronesian heathy forest](#)

Constant species of EUNIS habitats: [R53 Macaronesian thermophilous forest fringe](#), [S76 Canarian mountain hedgehog-heath](#), [T28 Macaronesian heathy forest](#)

### Broad habitat

Occurrence in broad habitats: **Grassland (non-alpine, non-saline),**

**Oromediterranean scrub, Forest**
