

# *Justicia adhatoda*

## Habitus and growth type

Plant height [m]: **1.83**

## Leaf

Specific leaf area [mm<sup>2</sup>/mg]: **12.04**

## Flower

Flowering period: **May-July**

## Trophic mode

Parasitism and mycoheterotrophy: **autotroph**

Carnivory: **non-carnivorous**

Symbiotic nitrogen fixation: **no nitrogen-fixing symbionts**

## Taxon origin

Origin in Europe: **Neophyte**

## Habitat and sociology

Broad habitat

Occurrence in broad habitats: **Scrub**
