

# ***Odontites sillettii***

## **Habitus and growth type**

Plant height [m]: **0.2**

Life span: **Annual**

Life form: **Therophyte**

## **Flower**

Flowering period: **August-November**

## **Trophic mode**

Parasitism and mycoheterotrophy: **euphytoid hemiparasite**

Carnivory: **non-carnivorous**

Symbiotic nitrogen fixation: **no nitrogen-fixing symbionts**

## **Habitat and sociology**

Broad habitat

Occurrence in broad habitats: **Grassland (non-alpine, non-saline), Scrub**
