

# *Oxytropis spicata*

## **Trophic mode**

Parasitism and mycoheterotrophy: **autotroph**

Carnivory: **non-carnivorous**

Symbiotic nitrogen fixation: **symbiosis with rhizobia**

## **Taxon origin**

Origin in Europe: **native**

## **Ecology**

Disturbance indicator values

Disturbance frequency: **2.2**

Disturbance frequency (herb layer): **2.2**

Disturbance severity: **0.5**

Disturbance severity (herb layer): **0.49**

Mowing frequency: **1.1**

Grazing pressure: **0.45**

Soil disturbance: **0.18**
