

Potamogeton sarmaticus

Habitus and growth type

Life span: **Perennial**

Life form: **Hydrophyte**

Trophic mode

Parasitism and mycoheterotrophy: **autotroph**

Carnivory: **non-carnivorous**

Symbiotic nitrogen fixation: **no nitrogen-fixing symbionts**

Taxon origin

Origin in Europe: **native**

Ecology

Environmental relationships

Substrate humidity relationship: **Water**

Ellenberg-type indicator values

Light indicator value: **6.5**

Temperature indicator value: **5.5**

Moisture indicator value: **11.5**
