

Alnus x pubescens

Habitus and growth type

Life span: **Perennial**

Life form: **Phanerophyte, Tree**

Fruit, seed and dispersal

Dispersal mode: **Dyszoochory**

Dispersal distance class: **6**

Trophic mode

Parasitism and mycoheterotrophy: **autotroph**

Carnivory: **non-carnivorous**

Symbiotic nitrogen fixation: **symbiosis with frankia**

Taxon origin

Origin in Europe: **native**
