

Acer obtusatum

Habitus and growth type

Plant height [m]: **8.62**

Life span: **Perennial**

Life form: **Phanerophyte, Tree**

Leaf

Specific leaf area [mm²/mg]: **19.63**

Flower

Flowering period: **March-April**

Fruit, seed and dispersal

Dispersal mode: **Anemochory**

Dispersal distance class: **4**

Trophic mode

Parasitism and mycoheterotrophy: **autotroph**

Carnivory: **non-carnivorous**

Symbiotic nitrogen fixation: **no nitrogen-fixing symbionts**

Habitat and sociology

Broad habitat

Occurrence in broad habitats: **Forest**
