

# ***Aconitum bucovinense***

## **Habitus and growth type**

Life span: **Perennial**

Life form: **Hemicryptophyte, Geophyte**

## **Trophic mode**

Parasitism and mycoheterotrophy: **autotroph**

Carnivory: **non-carnivorous**

Symbiotic nitrogen fixation: **no nitrogen-fixing symbionts**

## **Taxon origin**

Origin in Europe: **Native**

## **Ecology**

Environmental relationships

Substrate humidity relationship: **Wet**

Ellenberg-type indicator values

Light indicator value: **6.5**

Temperature indicator value: **2.5**

Moisture indicator value: **7**
