

# ***Aconitum carmichaelii***

## **Habitus and growth type**

Plant height [m]: **0.75**

## **Flower**

Flowering period: **August-November**

## **Trophic mode**

Parasitism and mycoheterotrophy: **autotroph**

Carnivory: **non-carnivorous**

Symbiotic nitrogen fixation: **no nitrogen-fixing symbionts**

## **Taxon origin**

Origin in Europe: **neophyte**

## **Habitat and sociology**

Broad habitat

Occurrence in broad habitats: **Scrub**
