

# *Allosorus fragilis*

## Fruit, seed and dispersal

Dispersal mode: **Anemochory**

Dispersal distance class: **5**

## Trophic mode

Parasitism and mycoheterotrophy: **autotroph**

Carnivory: **non-carnivorous**

Symbiotic nitrogen fixation: **no nitrogen-fixing symbionts**

## Habitat and sociology

EUNIS habitat

Diagnostic species of EUNIS habitats: [T3E Macaronesian Juniperus forest](#)

Broad habitat

Occurrence in broad habitats: **Forest**
