

Arabidopsis suecica

Habitus and growth type

Plant height [m]: **0.15**

Leaf

Specific leaf area [mm²/mg]: **31.57**

Trophic mode

Parasitism and mycoheterotrophy: **autotroph**

Carnivory: **non-carnivorous**

Symbiotic nitrogen fixation: **no nitrogen-fixing symbionts**

Taxon origin

Origin in Europe: **native**

Distribution

Continentality: **6**

Continentality amplitude: **2**
