Asyneuma campanuloides

Trophic mode

Parasitism and mycoheterotrophy: **autotroph**
Carnivory: **non-carnivorous**
Symbiotic nitrogen fixation: **no nitrogen-fixing symbionts**

Taxon origin

Origin in Europe: **native**

Ecology

Disturbance indicator values

Disturbance frequency: **0.6**
Disturbance frequency (herb layer): **1.66**
Disturbance severity: **0.54**
Disturbance severity (herb layer): **0.38**
Mowing frequency: **0.48**
Grazing pressure: **0.25**
Soil disturbance: **0.15**
