Ceratophyllum tanaiticum

Habitus and growth type

Life span: **Perennial**
Life form: **Hydrophyte**

Trophic mode

Parasitism and mycoheterotrophy: **autotroph**
Carnivory: **non-carnivorous**
Symbiotic nitrogen fixation: **no nitrogen-fixing symbionts**

Taxon origin

Origin in Europe: **native**

Ecology

Environmental relationships

Substrate humidity relationship: **Water**

Ellenberg-type indicator values

Light indicator value: **6.5**
Temperature indicator value: **5.5**
Moisture indicator value: **11**
