

# *Hippuris tetraphylla*

## Habitus and growth type

Life span: **Perennial**

Life form: **Hydrophyte**

## Fruit, seed and dispersal

Dispersal mode: **Epizoochory**

Dispersal distance class: **6**

## Trophic mode

Parasitism and mycoheterotrophy: **autotroph**

Carnivory: **non-carnivorous**

Symbiotic nitrogen fixation: **no nitrogen-fixing symbionts**

## Taxon origin

Origin in Europe: **Native**

## Habitat and sociology

EUNIS habitat

Diagnostic species of EUNIS habitats: [MA211 Arctic coastal saltmarsh](#)

Broad habitat

Occurrence in broad habitats: **Coastal saltmarsh**
