

# *Passiflora caerulea*

## Habitus and growth type

Plant height [m]: **2.1**

Life span: **Perennial**

Life form: **Phanerophyte, Woody liana**

## Flower

Flowering period: **June-November**

## Trophic mode

Parasitism and mycoheterotrophy: **autotroph**

Carnivory: **non-carnivorous**

Symbiotic nitrogen fixation: **no nitrogen-fixing symbionts**

## Taxon origin

Origin in Europe: **neophyte**

## Habitat and sociology

Broad habitat

Occurrence in broad habitats: **Scrub**
