# *Salix nummularia*

## Habitus and growth type

Life span: **Perennial**
Life form: **Chamaephyte**

## Fruit, seed and dispersal

Dispersal mode: **Anemochory**
Dispersal distance class: **5**

## Trophic mode

Parasitism and mycoheterotrophy: **autotroph**
Carnivory: **non-carnivorous**
Symbiotic nitrogen fixation: **no nitrogen-fixing symbionts**

## Taxon origin

Origin in Europe: **native**

## Ecology

### Disturbance indicator values

Disturbance frequency: **1.58**
Disturbance frequency (herb layer): **1.58**
Disturbance severity: **0.27**
Disturbance severity (herb layer): **0.27**
Mowing frequency: **0**
Grazing pressure: **0.31**
Soil disturbance: **0.1**
