Zelkova sicula

Habitus and growth type

Plant height [m]: **3.25**
Life span: **Perennial**
Life form: **Phanerophyte, Tree, Shrub**

Flower

Flowering period: **March-May**

Fruit, seed and dispersal

Dispersal mode: **Anemochory**
Dispersal distance class: **4**

Trophic mode

Parasitism and mycoheterotrophy: **autotroph**
Carnivory: **non-carnivorous**
Symbiotic nitrogen fixation: **no nitrogen-fixing symbionts**

Taxon origin

Origin in Europe: **Native**

Habitat and sociology

Broad habitat

Occurrence in broad habitats: **Scrub**
