

# *Parasenegalia visco*

## Habitus and growth type

Plant height [m]: **8.06**

Life span: **Perennial**

Life form: **Phanerophyte, Tree**

## Flower

Flowering period: **May-July**

## Trophic mode

Parasitism and mycoheterotrophy: **autotroph**

Carnivory: **non-carnivorous**

Symbiotic nitrogen fixation: **likely symbiosis with rhizobia**

## Habitat and sociology

Broad habitat

Occurrence in broad habitats: **Scrub**
